Amersfoort Project

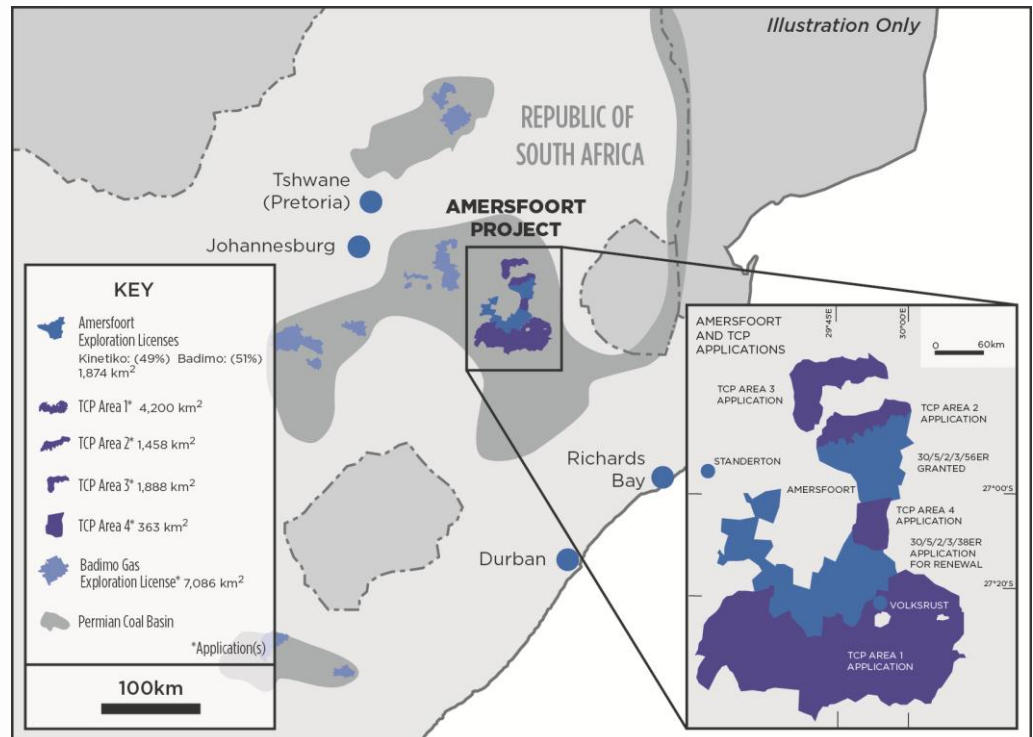

The Amersfoort area of the Eastern Transvaal is one of the most prospective areas for CBM with well documented, gassy coal measures. Kinetiko has 49% equity in 2 onshore gas licenses covering 1,874km² under a Farm Out agreement with a South African company Badimo Gas Ltd, Kinetiko is the Operator.

Independent Oil and Gas consultant: Gustavson Associates of Boulder Colorado have estimated the Amersfoort licenses have CBM Gas In Place (GIP) Resource of 1.7tcf and 1.12tcf Contingent Resource.

The goal of the Amersfoort Exploration program is to increase Resource certainty; this is largely dependent on Exploration success.

KINETIKO MAKES FOURTH SUCCESSFUL APPLICATION FOR 363Km² OF PROSPECTIVE LAND, THIS BRIDGES OUR TWO EXISTING EXPLORATION RIGHTS

- **PASA accepts Kinetiko's fourth TCP application (Technical Commercial Permit) for 363Km² of prospective land;**
- **Kinetiko's potential exploration area now totals 16,998Km²**
- **Amersfoort Phase 1 drilling (8 holes) 5 holes completed**
- **Based on 3 holes Kinetiko received a "Confirmed Discovery of Contingent Resources P50 estimate of 1.12TCF"**
- **Possibility of Conventional Gas which would be in addition to Resource estimates.**

If granted, a TCP entitles the holder the exclusive right to apply for and be granted an Exploration Right for the same area;

Once granted, a TCP entitles the holder up to 12 months to perform desktop studies. It also allows access to existing information and some exploration reconnaissance to assess whether to apply for the land;

The application is undergoing assessment and a PASA decision on whether it shall be granted is due within 6 months;

The Four Kinetiko TCP applications, could add 8,038Km² of prospective ground in addition to the Company's existing Amersfoort JV area of 1,874Km² and Badimo Gas (MOU signed) Exploration Right Applications

Kinetiko's actual and potential exploration area	
Amersfoort Project JV (current drilling operations)	1,874Km ²
TCP Area 1*	4,329Km ²
TCP Area 2*	1,458Km ²
TCP Area 3*	1,888Km ²
TCP Area 4*	363Km ²
Badimo Gas Applications* for Exploration Rights	7,086Km ²
Total Area (if all granted)	16,998Km²

*If granted by PASA

Managing Director, Andrew Lambert stated:

"The approval of our fourth TCP application links our two existing Exploration Rights with our Amersfoort project. These attractive exploration areas compliment our MOU with Badimo Gas (new project potential), and our success to date on our Amersfoort project which has a "Confirmed Discovery of Contingent Resource P50 of 1.12TCF". Kinetiko is building momentum on all Strategic areas"
